

A SEAMLESS MARRIAGE OF STYLE AND SUBSTANCE: MEET OUR MACHINES

Use our machine comparison below to find the NESCAFÉ® Dolce Gusto® machine that best suits you.

All machines feature a professional grade pressure based technology that extracts the **optimal flavor, aroma, and body** from the coffee.

The NESCAFÉ® Dolce Gusto® system brews a **wide beverage variety**, from bold to light—such as robust espresso, rich chococino, frothy cappuccino, creamy latte and exotic chai. The adjustable drip tray ensures you get the proper pour for whatever cup you choose to use.

Unlike most machines where cold beverages are brewed hot then cooled (and diluted!) over ice, all NESCAFÉ® Dolce Gusto® machines are equipped with **hot and cold beverage selectors** to brew full-strength cold coffees and iced teas.

All machines have an **energy-saving—and safety-promoting—mode**, featuring an auto shut-off after five minutes.
